

I support the XM Radio Traffic and Weather Channels. What they say and use on the radio is a great and useful way to show there interest in the listeners heath. By doing this they let people know and use the channels in there benefit to help them stay in a safe place and keep the weather on watch. I believe our Four Fathers set this many years ago saying "Freedom of Speech" in the First Amendment and keeping it held up is our duty. I think that they shouldn't be punished or made not to air on the radio. This a very useful service they provide to Americans. We have a lot more problems in the world today to worry about Traffic and Weather channels on XM Radio. We pay for the service and will continue to because there is not good meaning to make them stop there services. Thanks!!
